"My paintings are like sculptures; thick color applications break the frame. The works are expressive, colorful, modern, animating, impulsive, full of vitality and happiness."

Dexterously textured, vibrant works, reflecting a passionate palette with vivid explosions of pigment and form is the calling card of German-born artist Erica Fromme. Erica applies oil and acrylic paints to canvas freely, finding communication with her spirit through color as it permeates her creations with warmth and timelessness. Erica earned a Master degree in Contemporary Art and The Global Art Award for Abstract Art in Dubai November 2017. After three-year working residence at the South Florida Art Center in Miami Beach, Florida, Erica has been freelancing as a painter since 1991. The new paintings have their own style between Pop Art, Street Art and Abstract Art. She integrates unique materialmix into her paintings. Erica's large-formats, color intensive and expressive pictures have been exhibited internationally in Germany, America, Spain, Japan, France, and elsewhere. Her pieces are also treasured in both private and public collections. This "huetopian paintings" resonate strongly in the mind of the spectator. Thoroughly expressive in brushwork and pure, electric color.
